# Intro to JMC & JFR

## JDK Flight Recorder (JFR)

Events-based JVM technology for production time profiling and diagnostics

## JDK Mission Control (JMC)

Desktop application for JMX browsing and JFR visualization and analysis

## JDK Flight Recorder

Low overhead recording  
Compact, self-describing data  
Extensible

Like a Flight Recorder in an airplane

# JDK Mission Control

JMX Browser

JFR Visualization & Analysis

Core libraries for parsing and analyzing JFR data

JDK Flight Recorder

## Toolchain

Control JFR

CLI, POJO, JMX, jcmd tool, JMC

Add data

Java API, JMC Agent, 3rd-Party Integrations

Use data

JMC, jfr tool, 3rd-Party Applications

## General Workflow

Run JVM with JFR enabled

Acquire JFR file

Analyze JFR data with JMC

---

# Mini Demo! (JMC)

---

# Development Updates

## JMC project is now on GitHub via Skara

The contribution process can now be started with a GitHub pull request

<https://github.com/openjdk/jmc>

## JMC 7.0.0 ga tagged 2019-06-02

First open-source release of JDK Mission Control

## JMC 7.1.0 ga tagged 2019-12-06

Rule optimizations  
SWT-based JOverflow View  
Flamegraph View  
HdrHistogram View

## JMC Project Commits

## JMC Distributions

AdoptOpenJDK (Binary)

<https://adoptopenjdk.net/jmc.html>

Oracle (Binary & Eclipse Update Site)

Red Hat (RPMs for Fedora 29+ and RHEL 7+)

## Contributing to JMC

Mailing List: <https://mail.openjdk.java.net/mailman/listinfo/jmc-dev>

Slack: <https://jdkmissioncontrol.slack.com>

Bug tracker: <https://bugs.openjdk.java.net/projects/JMC/issues>

JMC Tutorial: <https://github.com/thegreystone/jmc-tutorial>

---

# Roadmap

## JFR in OpenJDK 8

CSR finalized and closed 2019-12-20

<https://hg.openjdk.java.net/jdk8u/jdk8u-jfr-incubator>

Todo: Merge into mainline

<https://mail.openjdk.java.net/pipermail/jdk8u-dev/2020-January/011063.html>

## JMC 8.0.0

Major release to target OpenJDK 15

OpenJDK 15: September 2020

JMC 8: ~November 2020

# JMC 8.0.0

JMC Agent

Rules 2.0

Update core libraries

Dynamic JFR Events

## JMC Agent

Declarative insertion of JFR events at runtime

Can be redefined

Optimized for the job

Automated Analysis

## Rules 2.0

Improve rule execution performance

Redesign rules for reuse

Add more typed information for visualization

Remove HTML from rule results

Updates!

## Core API

Use JDK 8 language features (previously 7)

Move some application API to Core for reuse by third-party applications

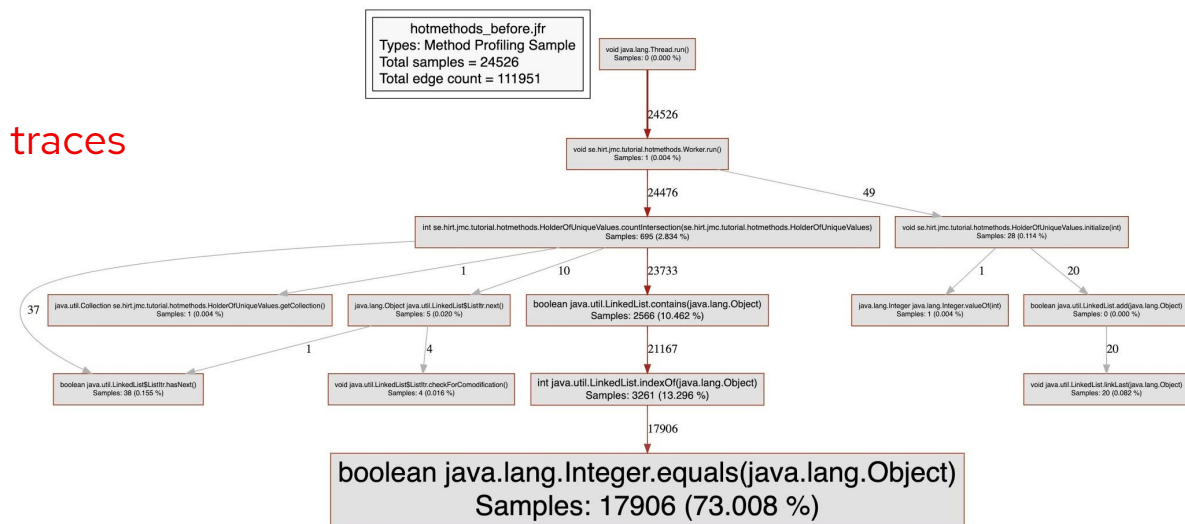

# JMC 8.0.0

New aggregated stack trace visualizations

Thread graph improvements

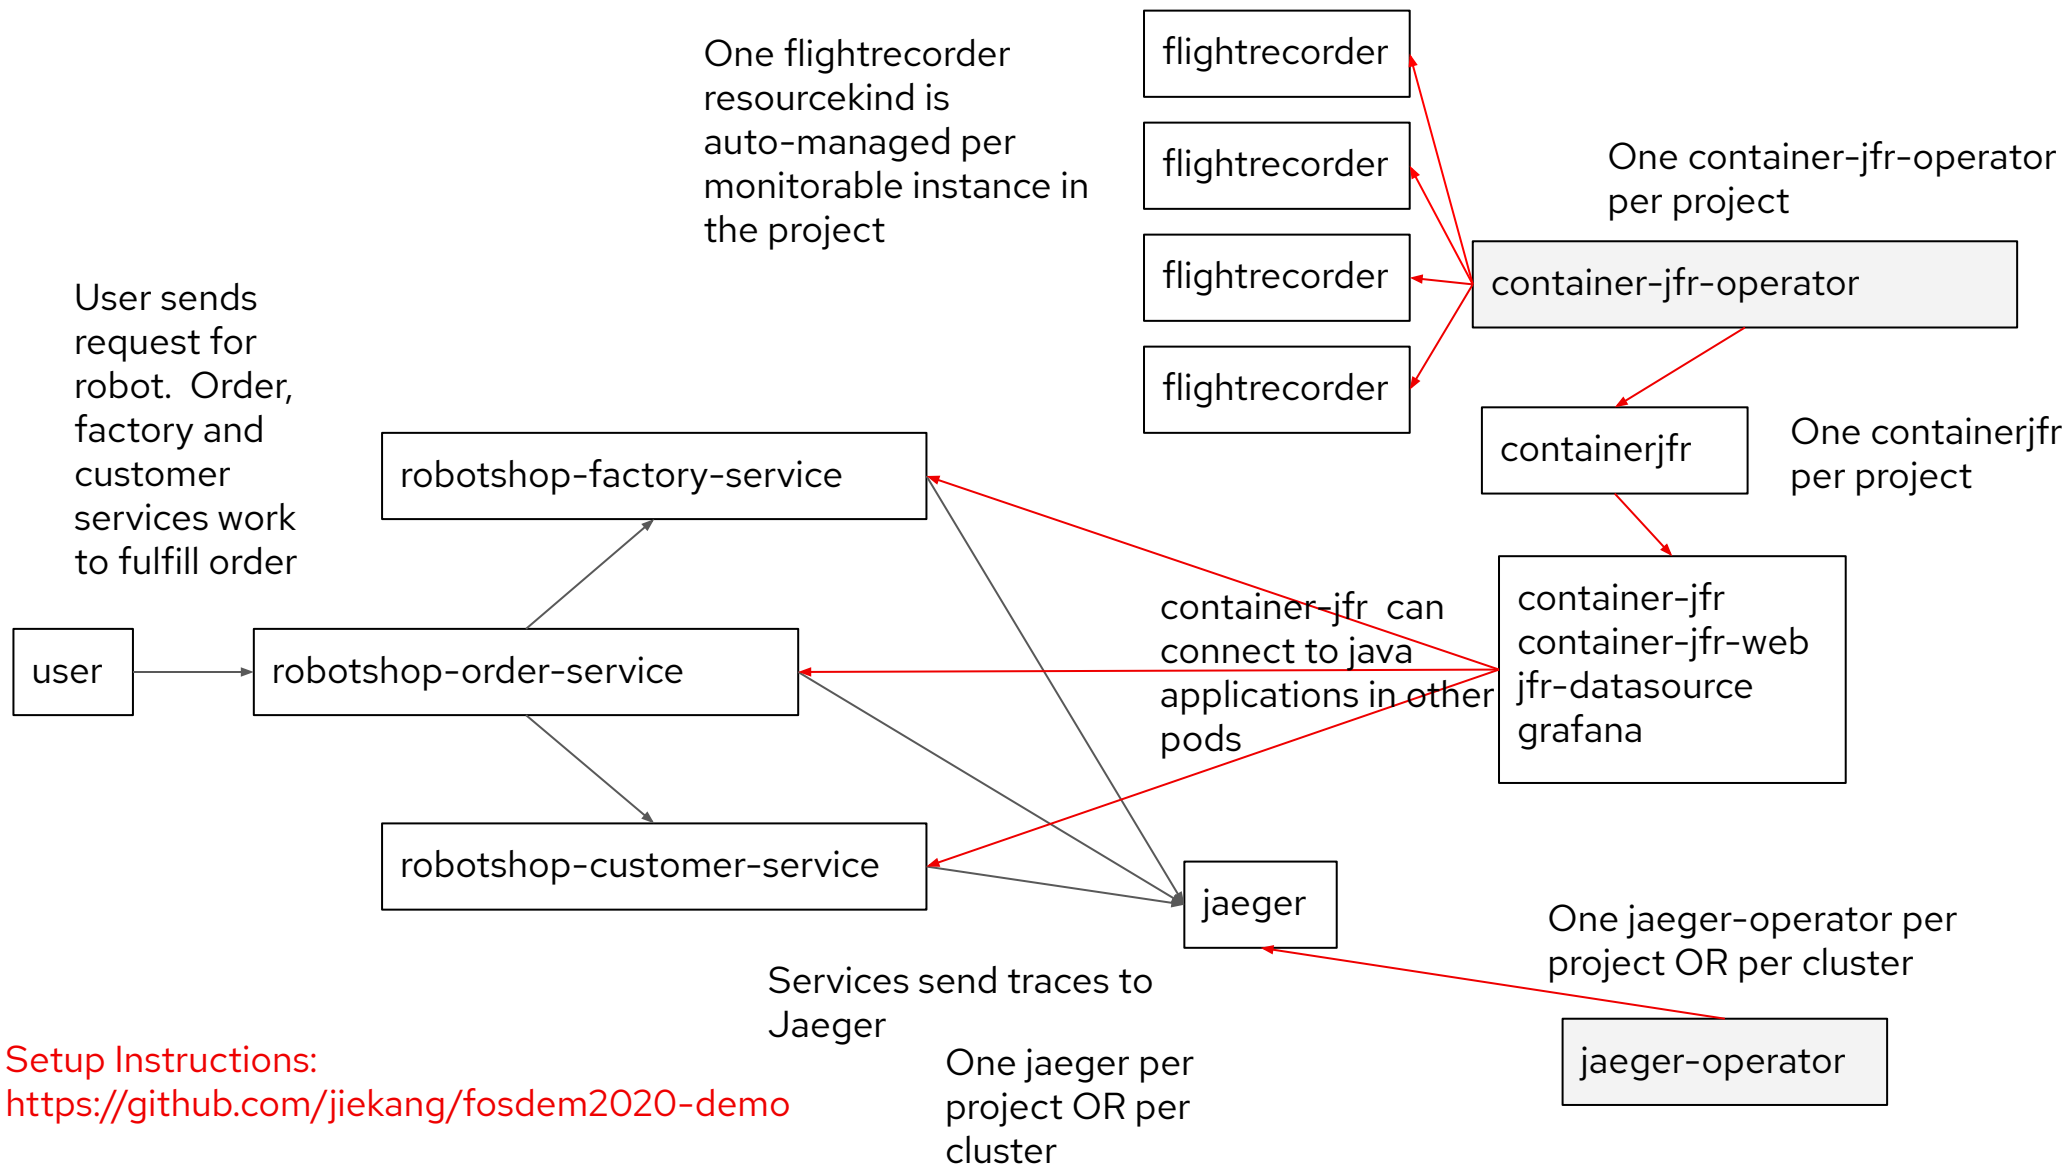

Flame Graph 2.0

Graph visualizations of stack traces

---

# Demo: JFR management in OpenShift with container-jfr

## container-jfr

Controlling JFR on JVMs in containers (Docker, Kubernetes, OpenShift)

GitHub Organization:

<https://github.com/rh-jmc-team>

## container-jfr features

- Start/Stop recordings
  - Archive recordings, download recordings
  - View automated analysis immediately
  - View events available for the JVM
- Manipulate via web UI or oc CLI
- [Link to Grafana](#)

## container-jfr

JFR management service  
k8s/oc API for JFR management

## container-jfr-core

Core libraries for JFR management

## container-jfr-web

Web front-end to ease use of container-jfr

## container-jfr-operator

Kubernetes/OpenShift Operator to ease deployment of container-jfr

## jfr-datasource

Grafana datasource for JFR files

<https://github.com/rh-jmc-team/jfr-datasource>

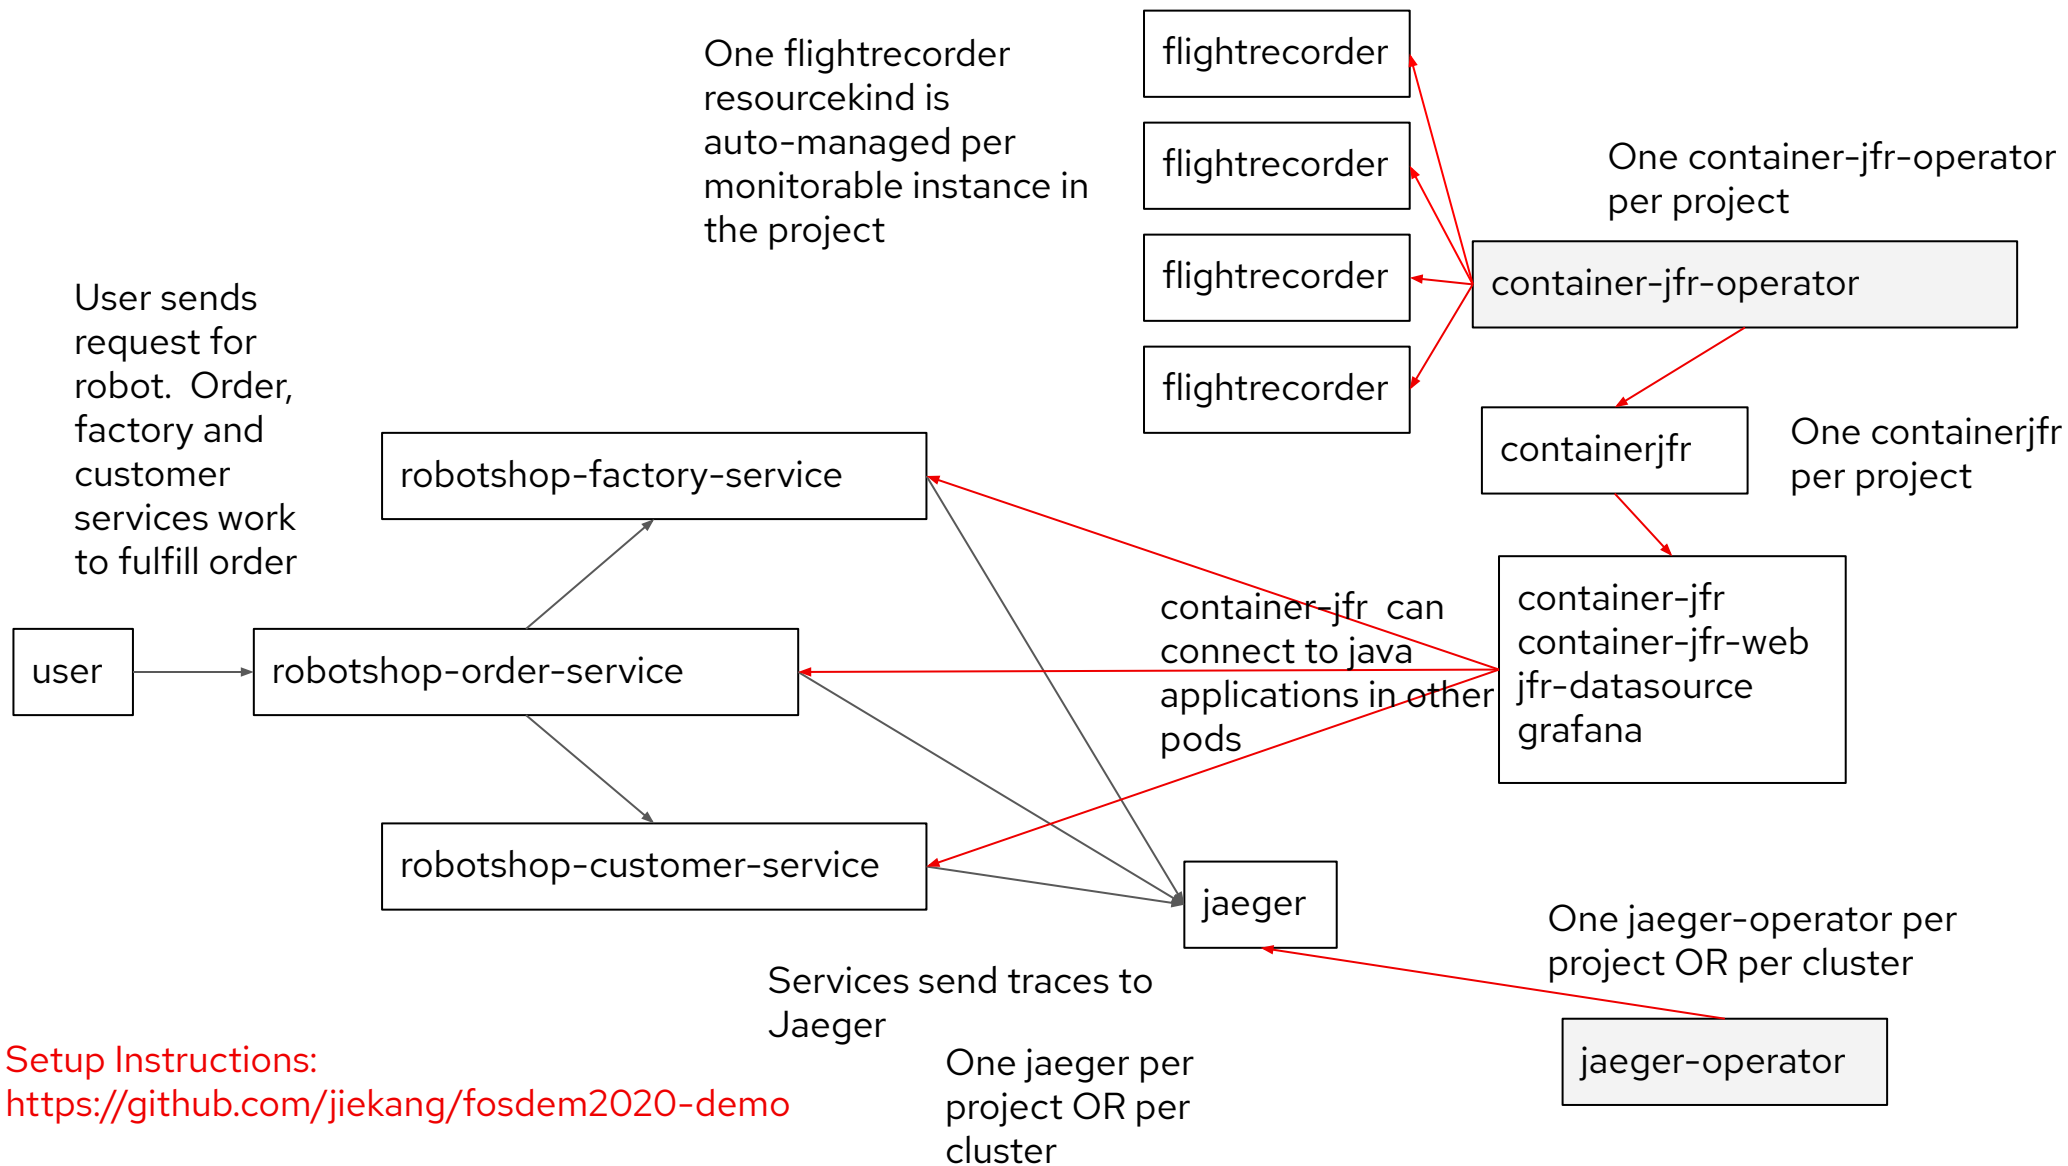

# Jaeger

Open-source, end-to-end distributed tracing  
Monitor and troubleshoot transactions in complex distributed systems

<https://www.jaegertracing.io/>

---

# Demo: JFR management in OpenShift with container-jfr
